DETAILED ACTION

Rejection Status

1. Applicant's arguments, see page 8, lines 5-11, filed 18 May 2005, with respect to the rejection(s) of claim(s) 50-65 and 67-81 under 35 USC 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, upon further consideration, a new ground(s) of rejection is made in view of US application no. 10/069,944.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 50-65 and 67-81 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 36-55 of copending Application No. 10/069,944. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is considered to be within the expected skill of a routineer in the art to recover the metal from the bioleach residue. Although the claims of the '944 application are silent as to using zinc sulfide

Art Unit: 1742

minerals, bioleach recovery of zinc from zinc sulfides was well known in the art as evidenced by Applicant's admission (paragraphs 3-6), and thus, one of ordinary skill in the art would have immediately envisaged using zinc sulfides.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
